DETAILED ACTION

Allowable Subject Matter

1. Claims 1-37 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: with respect to claims 1, 12 and 21 the closes prior art Meador '310 fails to teach or suggest, in the environment of a data sonde comprising a power supply receiving unit adapted to receive either internal battery and external power supply cable, an antenna is arranged to receive operative power from the external power supply cable and from the internal battery if no external power supply is received at the power supply receiving unit.

With respect to claims 35-37 the closes prior art fails to teach or suggest energizing the antenna with an encoded DC modulation representing data to be transmitted to a remote receiving apparatus, detecting at the remote apparatus the DC modulation in base band power consumption of the data sonde corresponding to the DC modulation energy of the data sonde antenna.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sezginer et al '779 and Thoraval '843 discloses sonde data systems.
